## Question: 1

You are preparing to migrate the topology of an installed VPLEX Local system. What is a supported upgrade path?

Response:

- A. Local to Geo to Global
- B. Local to Metro
- C. Local to Global
- D. Local to Metro to Geo

**Answer: B**

## Question: 2

When creating logging and metadata volumes, which LUN requirement applies to both volumes?

Response:

- A. Array LUNs must be zeroed-out.
- B. Array LUNs must be RAID 0
- C. Array LUNs must be thin.
- D. Array LUNs must be RAID 1

**Answer: A**

## Question: 3

What is a group of VPLEX directors that participate in the cache coherence protocol for a virtual volume?

Response:

- A. Storage View
- B. Consistency Group
- C. Share Group
- D. Administrative Domain

**Answer: C**

## Question: 4

Which volumes should be placed in Storage View for a RecoverPoint cluster?

Response:

- A.Journals, production, and copies only
- B.Repository, journals, production, and copies
- C.Repository, journals, and copies only
- D.Repository, journals, and production only

**Answer: B**

### Question: 5

Do virtual volumes need to be taken off-line prior to upgrading VPLEX software, and why or why not?

Response:

- A.Yes, to preserve data integrity
- B.Yes, because the host-based multi-pathing software provides direct access during the upgrade
- C.No, because VPLEX software can be upgraded non-disruptively
- D.No, because the upgrading can be undone

**Answer: C**

### Question: 6

What is the purpose of VPLEX Witness in a Metro environment?

Response:

- A.Observe the state of the clusters, Distinguish link outages, Intercluster failures, Resume or suspend I/O
- B.Prevent cluster link failure, Stop I/O transfer, Split consistency groups, Failover consistency groups
- C.Send notifications, Pause I/O transfer, Initiate vault dump, Failover consistency groups
- D.Observe state of the clusters, Suspend I/O, Execute health-check, Resume I/O

**Answer: A**

### Question: 7

In the distributed cache architecture, how much local cache does a VS2 director have?

Response:

- A.36 GB
- B.64 GB

C.32 GB  
D.72 GB

**Answer: C**

### Question: 8

You are doing a code upgrade on a VPLEX. In which directory do you put the upgrade files in order to execute the code upgrade?

Response:

- A./tmp/vfs
- B./diags/collect-diagnostics-out
- C./tmp/VPlexInstallPackages
- D./tmp/diags

**Answer: C**

### Question: 9

Which command is used to remove a custom monitor?

Response:

- A.monitor stop
- B.monitor disable
- C.monitor delete
- D.monitor destroy

**Answer: D**

### Question: 10

When do you enable the front-end ports during VPLEX installation?

Response:

- A.After create meta-volumes and backup
- B.Before create meta-volumes and backup
- C.Before launch EZ-Setup wizard
- D.After expose storage to hosts

**Answer: A**
