## Question: 2

A man decided to buy new furniture from Futuristic Furniture for \$2600. Futuristic Furniture gave the man two choices: pay the entire amount in one payment with cash, or pay \$1000 as a down payment and \$120 per month for two full years in the financial plan. If the man chooses the financial plan, how much more would he pay?

- A. \$1480 more
- B. \$1280 more
- C. \$1600 more
- D. \$2480 more
- E. \$3720 more

**Answer: B**

Explanation:

Multiply \$120 by 24 months (a full two years) to get \$2880. Add the thousand dollars for the down payment to get \$3880. Find the difference between the entire amount all at once (\$2600) and the amount paid in the plan (\$3880). To find the difference, you subtract. The difference shows that \$1280 more is paid with the installment plan.

- B. fecal matter
- C. the subcutaneous tissue of humans
