Question: 2

On which server should you install the Azure ATP sensor?

A. Server 1
B. Server 2
C. Server 3
D. Server 4
E. Server 5

Answer: A

Explanation:
Reference:
https://docs.microsoft.com/en-us/azure-advanced-threat-protection/atp-capacity-planning
However, if the case study had required that the DCs can't have any s/w installed, then the answer
would have been a standalone sensor on Server2. In this scenario, the given answer is correct. BTW, ATP
now known as Defender for Identity.

You need to meet the compliance requirements for the Windows 10 devices.
What should you create from the Intune admin center?

A. a device compliance policy
B. a device configuration profile
C. an application policy
D. an app configuration policy

Answer: C

HOTSPOT
You need to meet the Intune requirements for the Windows 10 devices.
What should you do? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Settings to configure in Azure AD: ▼

| Device settings |
| Mobility (MDM and MAM) |
