Question: 1

What is a logical destination for NetBackup client's backup data?

- A. Selection List
- B. Storage Unit
- C. Policy
- D. Catalog

Answer: B

Explanation:

The logical destinations for a NetBackup client's data include storage units, storage unit groups, and SLP.

Question: 2

Which of the following is not a selection type of storage unit groups?

- A. First-in First-out
- B. Failover
- C. Priority
- D. Round Robin

Answer: A

Explanation:

The four storage unit group selections include Failover, Priority, Round Robin and Media Server Load Balancing.

Question: 3

Which statement is true about OpsCenter?

- A. OpsCenter is a premium option from NetBackup that must be purchased separately.
- B. OpsCenter and OpsCenter Analytics are both 100% free.
- C. OpsCenter cannot be used to manage NetBackup versions prior to 7.5.
- D. Basic OpsCenter functionality is included with NetBackup (Additional functionality can be added by purchasing the OpsCenter Analytics option).

Answer: D

Question: 4

What are considerations in data protection planning?

- A. Retention periods
- B. Backup window availability
- C. All of the above
- D. Maximizing the availability of data
- E. Protecting systems and applications

Answer: C

Question: 5

Backups can be initiated by many methods.
Which method does not apply?

- A. As a user scheduled backup.
- B. Manually from the command line.
- C. Manually from the NetBackup Administration Console.
- D. Automatically, based on a policy schedule.

Answer: A

Question: 6

To support spanning backups in basic disk storage unit groups, what needs to be performed?

- A. Enable unrestricted media sharing, in the host properties.
- B. Configure the storage unit selection: Spanning.
- C. Allow backups to span disks, in the host properties.
- D. Ensure each basic disk storage unit is configured on a separate media server.

Answer: C

Explanation:

Configure Allow backups to span disks in the media server host properties. Ensure that all the basic disk storage unit is configured on the same media server.
