Question: 1

After reviewing her assignment, the LPN/VN tells the RN her assignment is very unfair and requests that some of her clients be redistributed to the other staff. What should the RN do?

- A. Ask the LPN/VN what her concerns are regarding her assignment.
- B. Remove one of the LPN/VN's clients and take the client as part of her load.
- C. Encourage the LPN/VN to use her teamwork skills in caring for her clients.
- D. Explain to the LPN/VN that everyone has a heavy load and to change the assignments now would not be possible.

Answer: A

Question: 2

A new nurse has a prescription to insert a feeding tube. The new nurse has never performed the procedure, but learned how to do it while in nursing school. What would be the best action by this nurse?

- A. Ask to observe another nurse perform the procedure.
- B. Look up how to perform the procedure in the policy and procedure manual.
- C. Tell the charge nurse that someone else will have to place the feeding tube down the client.
- D. Insert the feeding tube as learned in nursing school.

Answer: B

Question: 3

What resource should the nurse consult to define the standards of care for an institution?

- A. Organizational chart
- B. Personnel policies
- C. Policies and procedure manual
- D. Job descriptions

Answer: C

Question: 4

After report, the nurse is assigned to care for 4 adult clients. Which client should the nurse see first?

- A. Admitted 3 hours ago post appendectomy with small amount of drainage on dressing.
- B. Diagnosed with early onset of Alzheimer's disease with confusion.
- C. Post operative internal fixation of the femur with crust forming on the Steinman pins.
- D. Receiving treatment for dehydration, and is now picking at bedding and IV tubing.

Answer: D

Question: 5

What would be the most appropriate room assignment for the charge nurse to make for a school age child with seizures whose family cannot stay with the child at all times?

- A. A private room away from the elevator and nurse's station.
- B. A semi-private room near the nurse's station.
- C. Rooming with a preschooler admitted with behavioral problems.
- D. Rooming with a school age child admitted for developmental delays.

Answer: B

Question: 6

The nurse is working on an in-patient psychiatric unit. The nursing care plan includes teaching a client about assertiveness. The client has a long history of being manipulated by his employer and his spouse. What is the best rationale for including assertiveness training in this client's treatment plan?

- A. All clients should have assertiveness skills.
- B. The client has low self-esteem.
- C. The client is being taught self-advocacy.
- D. No client deserves to be manipulated by an employer.

Answer: C

Question: 7

Who often performs the responsibilities of a case manager? Select all that apply:

- 1. Physical therapist

- 2. Social worker
- 3. Primary healthcare provider
- 4. Nurse
- 5. Unlicensed assistive personnel

A. 3. Correct: First, the nurse will want to define that the interventions were performed. If they were not carried out, the goal could not be achieved.

B. 3. Correct: The nurse should report the observation to the supervisor. The nurse must serve as client advocate by reporting a nurse who may be impaired.

C. 1. Correct: The nurse should immediately inform the UAP and the code team of the client's code status and ask the UAP to stop CPR.

D. 2. & 4. Correct: A client's case manager can be a nurse, social worker, or other appropriate professional.

Answer: D

Question: 8
