Latest Version: 6.0

Question: 1

What factors determine the suitability of remote sites for replication?
(Select two.)

Response:

- A. Availability of high-speed network bandwidth
- B. Total capacity of the primary data center
- C. Physical distance from the primary site
- D. Frequency of data access at the remote site

Answer: A,C

Question: 2

What is the primary role of replication in a backup strategy?
Response:

- A. To archive old backups for long-term storage
- B. To create a real-time copy of data at a secondary site
- C. To reduce storage costs through deduplication
- D. To compress data before transferring to tape storage

Answer: B

Question: 3

A customer requires near-zero RTO and precise recovery to specific points in time. Which solution should they use?

Response:

- A. Tape-based archival backups
- B. Zerto Continuous Data Protection (CDP)
- C. Commvault standard backup policies
- D. Veeam Backup & Replication with default settings

Answer: B

Question: 4

How can compatibility with a customer's environment be verified?

Response:

- A. By assessing hardware lifecycle requirements
- B. By using SPOCK and ISV compatibility lists
- C. By limiting storage options to on-premises systems
- D. By avoiding multi-cloud integration

Answer: B

Question: 5

A customer needs rapid recovery for mission-critical applications. What backup type should be used?

Response:

- A. Crash-consistent backups
- B. Application-consistent backups
- C. Incremental backups
- D. Tape-based archival

Answer: B

Question: 6

A company has a daily data change rate of 5% and multiple remote sites. How should they plan their replication strategy?

Response:

- A. Use high-speed networks to replicate data incrementally to remote sites
- B. Reduce replication frequency to minimize network load
- C. Store backups locally and avoid replication
- D. Use cloud storage to archive backups without replication

Answer: A

Question: 7

How does HPE GreenLake for Disaster Recovery benefit customers?

Response:

- A. Provides immutable storage options
- B. Offers continuous data replication for rapid recovery
- C. Limits backup options to tape-based storage
- D. Requires fixed hardware setups

Answer: B

Question: 8

Which component of a Veeam solution handles backup and recovery orchestration?

Response:

- A. Veeam Backup Proxy
- B. Veeam Backup Repository
- C. Veeam Backup & Replication Console
- D. Veeam Data Mover

Answer: C

Question: 9

A business needs to minimize storage space usage and reduce data transfer costs. Which HPE feature should be proposed?

Response:

- A. Catalyst deduplication
- B. Immutable storage
- C. Backup to LTO tapes
- D. Real-time analytics

Answer: A

Question: 10

What factors impact RTO planning?

(Select two.)

Response:

- A. Maximum acceptable downtime
- B. Network latency between backup sites

- C. Size of the dataset to be recovered
- D. Retention schedule of archived data

Answer: A,C
