Latest Version: 6.0

Question: 1

What does it mean to contribute to an open source project "upstream"?

Response:

- A. To only use the latest version of the software without contributing back.
- B. To send modifications or improvements back to the original project repository.
- C. To distribute your version of the software without coordinating with the original project.
- D. To upload the project to a cloud server.

Answer: B

Question: 2

How can an organization contribute back to an open source project it consumes?

Response:

- A. By keeping any modifications private.
- B. By providing financial donations, contributing code, or offering documentation improvements.
- C. By selling the open source software as a proprietary product.
- D. By claiming original authorship of the open source project.

Answer: B

Question: 3

Why is understanding open source licenses important for developers in the financial services industry?

Response:

- A. It is only a requirement for legal teams, not developers.
- B. Understanding licenses is crucial for ensuring compliance and avoiding potential legal issues.
- C. It helps in selecting the most expensive software to ensure quality.
- D. Licenses are uniform and do not vary much between projects.

Answer: B

Question: 4

Which of the following best defines "conflict of interest"?

Response:

- A. A situation where an individual's personal interests align with their professional duties.
- B. A scenario where an individual's personal interests could potentially interfere with their professional responsibilities.
- C. A disagreement between colleagues in the workplace.
- D. A legal term that describes the mismanagement of company funds.

Answer: B

Question: 5

What impact do antitrust laws have on open source software development and distribution?

Response:

- A. They restrict the development of open source software to certain industries.
- B. Antitrust laws have no applicability to open source software.
- C. They ensure that the development and distribution of open source software do not violate competition laws.
- D. They mandate that all open source software must be distributed for free.

Answer: C

Question: 6

When selecting open source software, why is it important to assess the health and activity of its community?

Response:

- A. A vibrant community indicates the software is expensive to use.
- B. A healthy community suggests ongoing development, support, and sustainability of the software.
- C. Community health is irrelevant to the software's performance and security.
- D. Only projects with small communities should be selected to ensure exclusivity.

Answer: B

Question: 7

How can open source projects ensure compliance with the Americans with Disabilities Act (ADA) or similar regulations?

Response:

- A. By exclusively targeting users without disabilities.
- B. ADA compliance is not applicable to software, including open source projects.
- C. By designing software that is accessible and usable by people with a wide range of disabilities.
- D. Compliance is achieved by not distributing the software in the United States.

Answer: C

Question: 8

Before using an open source software in a project, what is the most important step to ensure compliance with its license?

Response:

- A. Modifying the software to fit project needs without reviewing the license.
- B. Reviewing the license to understand obligations and restrictions.
- C. Immediately redistributing the software to maximize its benefits.
- D. Paying the original developers for the right to use the software.

Answer: B

Question: 9

In the context of professional ethics, what does accountability mean?

Response:

- A. Avoiding responsibility for one's actions to maintain harmony in the workplace.
- B. Taking responsibility for one's actions and their consequences.
- C. Delegating tasks to others to ensure work is completed.
- D. Blaming others for failures while taking credit for successes.

Answer: B

Question: 10

Which compliance requirement might affect the use of cryptography in open source software?

Response:

- A. Health Insurance Portability and Accountability Act (HIPAA)
- B. Export control laws
- C. Fair Labor Standards Act

D. The Sherman Antitrust Act

Answer: B
