Latest Version: 6.0

Question: 1

Detaching a volume from a server requires which of the following actions in Hitachi Ops Center Administrator?

Response:

- A. Physically disconnecting the server from the storage array
- B. Running a full backup of the volume
- C. Unmapping the volume from the host group
- D. Rebooting the storage controller

Answer: C

Question: 2

What are the key considerations when adding resources to Hitachi Ops Center Administrator for monitoring?

(Choose two)

Response:

- A. The compatibility of resources with the existing IT infrastructure
- B. The physical location of the resources
- C. The version of the Hitachi Ops Center Administrator being used
- D. The network visibility of the resources

Answer: A,D

Question: 3

External storage migration is utilized for which of the following reasons?

Response:

- A. To change the color scheme of the user interface
- B. To move data between different storage systems
- C. To increase the temperature of the storage environment
- D. To decrease data security

Answer: B

Question: 4

In the context of HDLM, how does the concept of ALUA improve storage system performance?

Response:

- A. By enabling the storage array to communicate the preferred path to the host for optimized access
- B. Through manual selection of preferred data paths by the administrator
- C. By prioritizing data transfer speeds over security
- D. By eliminating the need for multiple paths, thus simplifying the network topology

Answer: A

Question: 5

Adaptive Data Reduction (ADR) in Hitachi Ops Center Administrator utilizes which techniques to optimize storage?

(Choose two)

Response:

- A. Data deduplication
- B. Data encryption
- C. Compression
- D. Blockchain verification

Answer: A,C

Question: 6

Volume specifications typically include which of the following characteristics?

Response:

- A. Color and design of the physical disk
- B. The brand and model of the storage device
- C. Capacity, RAID level, and accessibility
- D. The operating system of the host server

Answer: C

Question: 7

Host Group configurations are essential for what reason?

Response:

- A. They prevent unauthorized access to the physical storage devices
- B. They designate the physical location of storage devices within the data center
- C. They are required for all storage arrays to function correctly
- D. They allow for the logical grouping of hosts that share similar storage access patterns, simplifying volume management

Answer: D

Question: 8

Which of the following statements are true regarding the login process for Hitachi Ops Center Administrator?

(Choose two)

Response:

- A. It requires biometric authentication.
- B. It supports multi-factor authentication.
- C. Users can login using social media accounts.
- D. It offers a customizable user interface post-login.

Answer: B,D

Question: 9

In which scenarios is Adaptive Data Reduction (ADR) particularly beneficial?

(Choose two)

Response:

- A. When storing large volumes of highly redundant data
- B. For databases requiring real-time transaction processing
- C. In virtualized environments with many similar virtual machines
- D. When data is mostly unique and does not benefit from deduplication

Answer: A,C
