## Question: 1

How do you properly configure UiPath Remote Runtime for use with Citrix Virtual Apps and Desktops?  
Response:

- A. Install the Remote Runtime component on the Citrix Application server and configure a direct connection to the UiPath Studio
- B. Install the Remote Runtime component on Citrix Application servers and the corresponding UiPath extension on the client machine
- C. Install the Remote Runtime component on both the Citrix Application servers and the client machine
- D. Install the Remote Runtime component only on the client machine

**Answer: B**

## Question: 2

What LINQ query can be used to filter a list of DataTables based on a specific column's value in C#?  
Response:

- A. `myDataTables.GroupBy(dt => dt.AsEnumerable().All(row => row["ColumnName"].ToString() == "Value"))`
- B. `myDataTables.Select(dt => dt.AsEnumerable().Where(row => row["ColumnName"].ToString() == "Value"))`
- C. `myDataTables.OrderBy(dt => dt.AsEnumerable().Any(row => row["ColumnName"].ToString() == "Value"))`
- D. `myDataTables.Where(dt => dt.AsEnumerable().Any(row => row["ColumnName"].ToString() == "Value"))`

**Answer: D**

## Question: 3

How can the Invoke Code activity be used to execute vb.net code with an input argument and an output argument in a UiPath project?  
Response:

- A. Create a sequence, add an Invoke Code activity, use the Edit Code button to define input and output arguments, and add the vb.net code using an Assign activity.

- B. Create a sequence, add an Invoke Code activity, add the vb.net code using the Edit Code button, and use the Edit Arguments button to define input and output arguments.
- C. Create a sequence, add an Invoke Code activity, add the vb.net code in the Arguments property of the activity, and use the Edit Arguments button to define input and output arguments.
- D. Create a sequence, add an Invoke Code activity, add an Assign activity to define input and output arguments, and use the Edit Code button to edit the vb.net code.

**Answer: B**

### Question: 4

In a UiPath State Machine, what are the three sections found within a Transition activity when it's expanded?

Response:

- A. Entry, Exit, and Transition(s).
- B. Trigger, Condition, and Exit.
- C. Trigger, Condition, and Action.
- D. Entry, Condition, and Action.

**Answer: C**

### Question: 5

When iterating through multiple digital PDF invoice files with the same structure, what action should be taken to retrieve the "Total Value" based on best practices?

Response:

- A. Validate selectors for all invoices.
- B. Copy the total values using Hotkeys.
- C. Use the Find Image and Get Text activities.
- D. Use OCR activities to extract the "Total Value" from all invoices.

**Answer: A**

### Question: 6

After installing UiPath Remote Runtime, what automatically happens at every user login on the remote server?

Response:

- A. The UiPathRemoteRuntime.exe process automatically configures the remote server for optimal automation performance.
- B. A task in the Task Scheduler starts the UiPathRemoteRuntime.exe process for every user logged in.
- C. The UiPathRemoteRuntime.exe process launches a dedicated UiPath Studio instance for each user.
- D. The UiPathRemoteRuntime.exe process verifies the compatibility of installed extensions on the remote server and updates them if necessary.

**Answer: B**

### Question: 7

What is the name of the state(s) where the TransactionItem variable is used, in the context of a Performer process that uses the Robotic Enterprise Framework template and Orchestrator queues?  
Response:

- A. Get Transaction Data and Process Transaction.
- B. Process Transaction.
- C. Initialization and Get Transaction Data.
- D. Process Transaction and End Process.
- E. Initialization and End Process.

**Answer: A**

### Question: 8

Based on the UiPath best practices, when a Business Rule Exception occurs while processing an item from an Orchestrator queue, what is the transaction item status that should be set to that particular Queue Item?  
Response:

- A. In Progress
- B. Verified
- C. Business Exception
- D. Failed
- E. Fatal

**Answer: D**

### Question: 9

---

In UiPath Orchestrator Monitoring, which feature allows you to centrally analyze the performance and efficiency of your automation processes across multiple components, such as Robots, Machines, Queues, and Jobs?

Response:

- A. Execution Logs
- B. Asset Management
- C. Version Control
- D. Insights Dashboard

**Answer: D**

### Question: 10

Which Log Levels will be displayed if a user of UiPath Orchestrator filters the severity to Error for UiPath Robots' logs?

Response:

- A. Error and Fatal.
- B. Info, Warn, and Error.
- C. Warn and Error.
- D. Error only.

**Answer: A**
