Question: 1

In the process of collecting HCP-CS log files, what is an important consideration for maintaining security?
Response:

- A. Log files should be encrypted before storage
- B. Logs should only include error messages
- C. Log collection must be scheduled during off-peak hours
- D. Only senior managers should have access to log files

Answer: A

Question: 2

When configuring the HCP-CS Bucket Lifecycle Policy, what factors should be considered?
(Choose Three)
Response:

- A. Retention period of the objects
- B. Physical location of the data center
- C. Automatic archival of old objects
- D. Deletion of expired objects
- E. Color scheme of the storage interface

Answer: A,C,D

Question: 3

When using Jaeger for tracing in HCP-CS, what is primarily traced?
Response:

- A. Network latency and data packet loss
- B. User interface interactions
- C. Application-level transactions
- D. Physical hardware status

Answer: C

Question: 4

In configuring a system to add an Amazon S3 storage component, what settings must be defined?

(Choose Two)

Response:

- A. Region where the S3 bucket will be located
- B. The minimum file size allowable for storage
- C. Access control policies for the bucket
- D. Color theme of the AWS Management Console

Answer: A,C

Question: 5

What are the key considerations when interconnecting VSP 5000 disk controllers?

(Choose Two)

Response:

- A. Ensuring redundant paths for data availability
- B. Selecting the correct type of dietary options for the team
- C. Confirming switch port speeds and capabilities
- D. Checking the aesthetic layout of the wiring

Answer: A,C

Question: 6

How does HCP-CS ensure data encryption keys are secure?

Response:

- A. By storing them in plain text files
- B. By using a dedicated physical storage device for keys
- C. By distributing keys across multiple network nodes
- D. By managing them through an encrypted KMS Vault

Answer: D

Question: 7

How are HCP-CS database metadata partitions typically structured?

Response:

- A. In a flat, non-hierarchical format for simplicity
- B. Hierarchically to enhance data retrieval speed
- C. Dynamically partitioned based on data type
- D. Geographically distributed for disaster recovery

Answer: C

Question: 8

Which of the following is a key functionality of service management in IT systems?

Response:

- A. Overclocking CPU on critical servers
- B. Managing lifecycle of IT services
- C. Conducting penetration testing periodically
- D. Allocating office spaces and resources

Answer: B

Question: 9

To add an Amazon S3 storage component to your system, what is the initial step?

Response:

- A. Purchase additional hardware for S3 integration
- B. Configure S3 buckets in the Amazon AWS Management Console
- C. Increase the bandwidth of your internal network
- D. Apply for a security clearance from Amazon

Answer: B

Question: 10

Why is it necessary to unseal the KMS Vault?

Response:

- A. To perform routine maintenance on the hardware
- B. To allow access to encrypted data keys
- C. To update the HCP-CS software version

D. To conduct an internal audit of data usage

Answer: B
