Latest Version: 6.1

Question: 1

Which of the following should be considered during the planning phase of a Cyber Recovery Vault?
Response:

- A. Physical distance between production and recovery sites
- B. The use of thin provisioning
- C. Network switch redundancy
- D. VLAN segmentation

Answer: A

Question: 2

Which of the following is a key element of Post-Deployment Verification?
Response:

- A. Configuring VLANs
- B. Verifying that the network's performance matches the design specifications
- C. Assigning IP addresses
- D. Installing network cables

Answer: B

Question: 3

What is the main function of CloudIQ in the planning and management of Dell PowerSwitch devices?
Response:

- A. Provides cloud-based storage for network configurations
- B. Enables predictive analytics and performance monitoring
- C. Manages firewall rules and security policies
- D. Provides licensing for PowerSwitch devices

Answer: B

Question: 4

Match the following roles in networking design with their corresponding responsibilities:

Role

Network Architect

Network Administrator

Security Engineer

Systems Engineer

Responsibility

A) Designs the entire network structure

B) Manages day-to-day network operations

C) Implements firewalls and intrusion detection

D) Manages servers and network services

Response:

A. Network Architect - A

Network Administrator - B

Security Engineer - C

Systems Engineer - D

B. Network Architect - C

Network Administrator - D

Security Engineer - A

Systems Engineer - B

C. Network Architect - D

Network Administrator - B

Security Engineer - C

Systems Engineer - A

D. Network Architect - A

Network Administrator - B

Security Engineer - D

Systems Engineer - C

Answer: A

Question: 5

Which of the following steps should be taken when modifying a network design template for a specific project?

Response:

A. Reuse the template from a previous project without changes

B. Customize the template to reflect the unique requirements of the current project

C. Use a generic template without customization

D. Add all devices to a single VLAN

Answer: B

Question: 6

What is the primary purpose of using templates in a network design project?

Response:

- A. To automate network configuration
- B. To standardize documentation and ensure consistency
- C. To generate real-time network traffic reports
- D. To assign IP addresses dynamically

Answer: B

Question: 7

What are three design best practices when discussing the potential for a network replacement?

Response:

- A. Remove and decommission the hardware.
- B. Recommend the one-size-fits-all solutions in the Dell Portfolio.
- C. Document the replacement steps.
- D. Provide support for onsite replacement.
- E. Review existing network configurations for Dell, Cisco, and HP switches.

Answer: C,D,E

Question: 8

A customer is looking for 25 GbE connectivity to meet the heavy server and storage demands in their virtualized environment. What port type provides this connectivity?

Response:

- A. RJ45
- B. SFP28
- C. SFP+
- D. QSFP+

Answer: B

Question: 9

A network was designed, and the products were shipped to the customer. What must a Design Architect be familiar with to properly document the network design?

Response:

- A. Financial budgets and constraints
- B. Tools and templates
- C. Access to Customer Support

Answer: B

Question: 10

What is a standard deployment method for an L3 network?

Response:

- A. BGP neighborship
- B. Device link detection protocol
- C. Unidirectional link detection
- D. Link aggregation control protocol

Answer: A
