Question: 1

What is a primary benefit of combining Product Discovery with Customer Research?
Response:

- A. It reduces the time spent on understanding customer needs
- B. It aligns product development with validated customer insights
- C. It eliminates the need for iterative testing
- D. It prioritizes product features over user outcomes

Answer: B

Question: 2

How are Business Agility and Organizational Agility related?
Response:

- A. They are independent and do not influence each other.
- B. Business Agility depends entirely on Organizational Agility.
- C. They are interconnected, with Organizational Agility enabling Business Agility.
- D. Organizational Agility is a subset of Business Agility.

Answer: C

Question: 3

In the context of Agile, what is the primary goal of Intentional Architecture?
Response:

- A. To create a rigid structure that limits flexibility
- B. To guide development with a deliberate yet adaptable framework
- C. To delay architectural decisions until after product development
- D. To eliminate architectural planning to increase innovation

Answer: B

Question: 4

In the context of the O-AA Standard, how is a “Product” typically defined?

Response:

- A. A tangible deliverable with fixed specifications
- B. An evolving entity designed to deliver continuous value
- C. A set of unrelated features bundled together
- D. A project managed with strict timelines

Answer: B

Question: 5

What does Axiom 8: Loosely-Coupled Systems promote in an Agile architecture?

Response:

- A. A rigidly interconnected architecture
- B. Modular components that can operate independently
- C. Dependence on a centralized database for all operations
- D. Complete elimination of dependencies between systems

Answer: B

Question: 6

Which of the following is a key consideration for maintaining Security as a Non-Functional Requirement?

Response:

- A. Adding security features post-deployment
- B. Incorporating security measures throughout the development lifecycle
- C. Limiting security testing to a single phase
- D. Delegating security entirely to the operations team

Answer: B

Question: 7

Which type of team focuses on delivering a continuous flow of value directly to customers?

Response:

- A. Competency Teams
- B. Platform Teams

- C. Stream-Aligned Teams
- D. Support Teams

Answer: C

Question: 8

Why is the Car Sharing Platform a relevant case study for Intentional Architecture?

Response:

- A. It demonstrates the failure of Agile architecture principles.
- B. It highlights the importance of cross-functional team collaboration and adaptability.
- C. It focuses exclusively on product development without architectural input.
- D. It emphasizes the drawbacks of Continuous Product Development.

Answer: B

Question: 9

How does governance of Agile Security Architecture differ from traditional security governance?

Response:

- A. It relies on predefined policies and static controls.
- B. It emphasizes adaptive, iterative, and collaborative approaches to security.
- C. It separates security governance from development processes.
- D. It limits team involvement in security decisions.

Answer: B

Question: 10

Why is achieving O-AA Certification beneficial for an individual practitioner?

Response:

- A. It demonstrates expertise in designing and implementing Agile-friendly architectures.
- B. It guarantees employment in Agile organizations.
- C. It eliminates the need for continuous learning in the architecture domain.
- D. It focuses only on theoretical knowledge without practical application.

Answer: A
