Question: 1

What two tasks are required to generate firewall logs in Pensando PSM?
(Select TWO)

Response:

- A. Creating QoS Policies
- B. Enabling logging in firewall rules
- C. Configuring DNS Forwarding
- D. Assigning logging policies to VRFs

Answer: B,D

Question: 2

How are logs created in Pensando PSM for monitoring purposes?

Response:

- A. By configuring VLANs
- B. By applying QoS settings
- C. By configuring IPsec policies
- D. By enabling logging in firewall rules

Answer: D

Question: 3

Which two features are key to the security of the CX 10000 series?

(Select TWO)

Response:

- A. Distributed Data Encryption
- B. ASIC-based Threat Detection
- C. VRF-Based Microsegmentation
- D. HTTP-based Management

Answer: B,C

Question: 4

Which two components must be configured during the Pensando PSM installation process?

(Select TWO)

Response:

- A. NTP Server
- B. IPsec Tunnel
- C. Storage Retention Policies
- D. VLAN ID

Answer: A,C

Question: 5

An administrator is configuring HPE Aruba Networking Fabric Composer for a new data center. The goal is to efficiently manage multiple fabrics across a leaf-spine architecture. What should the administrator configure first to ensure smooth operation?

Response:

- A. Set up user roles and access controls
- B. Configure DNS and NTP servers
- C. Install third-party software integrations
- D. Enable multicast routing

Answer: A

Question: 6

Which two functions can be monitored using Pensando PSM's visualization tools?

(Select TWO)

Response:

- A. VLAN Configuration
- B. Traffic Bandwidth
- C. Device Status
- D. IPsec Tunnel Creation

Answer: B,C

Question: 7

During installation, what must be configured for Pensando PSM to retain data effectively?

Response:

- A. High-availability setup
- B. Storage partitioning and retention policies
- C. VLAN segmentation
- D. Firewall rules

Answer: B

Question: 8

How does the CX 10000 Series enhance security in a distributed architecture?

Response:

- A. By providing centralized firewalls
- B. By integrating VRF-based microsegmentation
- C. By applying QoS policies
- D. By enabling VLAN routing

Answer: B

Question: 9

In HPE Aruba Networking Fabric Composer, how is a switch typically added to a fabric?

Response:

- A. Using the fabric-assign CLI command
- B. By configuring the switch with SNMP traps
- C. By discovering the switch and assigning it via the GUI
- D. By enabling DHCP relay on the switch

Answer: C

Question: 10

What are two benefits of using Fabric Composer's graphical user interface (GUI)?

(Select TWO)

Response:

- A. Enhanced visibility of network topology
- B. Improved routing table management
- C. Automated software patching
- D. Simplified device management

Answer: A,D
