Question: 1

Which of the following are valid types of HL7 CDA documents? (Select all that apply)

- A. Continuity of Care Document (CCD)
- B. Clinical Document Architecture (CDA)
- C. Consolidated Clinical Document Architecture (CCrDA)
- D. Diagnostic Imaging Report (DIR)
- E. Patient Care Document (PCD)

Answer: A

Explanation:

Continuity of Care Document (CCD), Clinical Document Architecture (CDA), Diagnostic Imaging Report (DIR), and Patient Care Document (PCD) are all valid types of HL7 CDA documents. Consolidated Clinical Document Architecture (CCrDA) is not a valid type of HL7 CDA document.

Question: 2

What is the purpose of the HL7 CDA header?

- A. To identify the document type
- B. To provide patient demographics
- C. To provide document metadata
- D. To include clinical observations and findings

Answer: C

Explanation:

The HL7 CDA header provides document metadata, such as document creation date, author, title, and confidentiality level.

Question: 3

Which of the following is a required section of an HL7 CDA document? (Select all that apply)

- A. History of Present Illness
- B. Medications
- C. Allergies and Adverse Reactions

- D. Social History
- E. Vital Signs

Answer: B,C

Explanation:

Medications and Allergies and Adverse Reactions are both required sections of an HL7 CDA document. History of Present Illness, Social History, and Vital Signs are optional sections.

Question: 4

What is the purpose of an HL7 CDA template?

- A. To provide a structure for a specific type of clinical document
- B. To provide patient demographics
- C. To provide document metadata
- D. To include clinical observations and findings

Answer: A

Explanation:

An HL7 CDA template provides a structure for a specific type of clinical document, such as a discharge summary or progress note.

Question: 5

Which of the following are benefits of using HL7 CDA documents? (Select all that apply)

- A. Improved communication between healthcare providers
- B. Increased patient safety
- C. Reduced healthcare costs
- D. Easier access to patient health information
- E. Enhanced interoperability between healthcare systems

Answer: A,B,D,E

Explanation:

Using HL7 CDA documents can improve communication between healthcare providers, increase patient safety, provide easier access to patient health information, and enhance interoperability between healthcare systems. It may also contribute to reduced healthcare costs by improving efficiency and reducing errors.

Question: 6

Which of the following is NOT a benefit of using cloud computing?

- A. Scalability
- B. Cost savings
- C. Reduced security risks
- D. Increased flexibility
- E. Faster time to market

Answer: C

Explanation:

Reduced security risks. While cloud providers offer a variety of security measures, it is ultimately the responsibility of the customer to ensure their data is secure.

Question: 7

What is the primary purpose of a firewall?

- A. To block unauthorized access to a network
- B. To encrypt data transmissions
- C. To speed up network traffic
- D. To monitor network usage
- E. To store backup data

Answer: A

Explanation:

To block unauthorized access to a network. Firewalls are a key component of network security and help to prevent unauthorized access to a network by filtering incoming and outgoing traffic.

Which of the following is a commonly used programming language for web development?

Question: 8

What is the purpose of version control software?

- A. To track changes made to code over time
- B. To automatically test code for bugs
- C. To monitor network traffic
- D. To create and manage virtual machines
- E. To encrypt data transmissions

Answer: A

Explanation:

To track changes made to code over time. Version control software is used by developers to keep track of changes made to code over time, and allows multiple developers to collaborate on a project without overwriting each other's work.

Question: 9

Which of the following is NOT a commonly used cloud computing deployment model?

- A. Public cloud
- B. Private cloud
- C. Hybrid cloud
- D. Community cloud
- E. Virtual cloud

Answer: E

Explanation:

Virtual cloud. While virtualization is a key technology used in cloud computing, a "virtual cloud" is not a commonly used deployment model. The other options - public, private, hybrid, and community cloud - are all commonly used deployment models.

Question: 10

Which organization developed HL7 CDA?

- A. Health Level Seven International (HL7)
- B. American Medical Association (AMA)
- C. International Organization for Standardization (ISO)
- D. World Health Organization (WHO)
- E. Centers for Disease Control and Prevention (CDC)

Answer: A

Explanation:

Health Level Seven International (HL7) developed HL7 CDA.
